

Contents of Volume 12

No. 1

<i>E. De Clercq (Belgium)</i> New acquisitions in the development of anti-HIV agents (Review Article)	1
<i>N. Yamamoto, H. Furukaza, Y. Ito, S. Yoshida, K. Maeno and Y. Nishiyama (Japan)</i> Anti-herpesvirus activity of citrussinine-I, a new acridone alkaloid, and related compounds	21
<i>M.J. Tymms, B. McInnes, G.J. Waine, B.F. Cheetham and Linnane (Australia)</i> Functional significance of amino acid residues within conserved hydrophilic regions in human interferons- α	37
<i>P.G. Higgins, G.I. Barrow, A.W. Galbraith, H. Frost and D.A.J. Tyrrell (U.K., Switzerland)</i> A note on the failure of CGP 19835 A (MTP-PE) to influence the course of influenza A2 infection in human volunteers (Short Communication)	49
Announcements	53

No. 2

<i>J.B. Hudson (Canada)</i> Plant photosensitizers with antiviral properties (Review Article)	55
<i>R.A. Heijntink, G.A. de Wilde, J. Kruining, M.B.L. Smit-Leijs and S.W. Schalm (The Netherlands)</i> Anti-pre-s(2) analysis after hepatitis B vaccination in haemodialysis patients	75
<i>M. Hosoya, S. Shigeta, K. Nakamura and E. De Clercq (Japan, Belgium)</i> Inhibitory effect of selected antiviral compounds on measles (SSPE) virus replication in vitro	87
<i>G. Spedding, A. Ratty and E. Middleton, Jr. (U.S.A.)</i> Inhibition of reverse transcriptases by flavonoids	99
Announcements	111

No. 3

<i>J.A. Montgomery (U.S.A.)</i> Approaches to antiviral chemotherapy (Mini Review)	113
<i>A. Van Aerschot, P. Herdewijn, G. Janssen, M. Cools and E. De Clercq (Belgium)</i> Synthesis and antiviral activity evaluation of 3'-fluoro-3'-deoxyribonucleosides: broad-spectrum antiviral activity of 3'-fluoro-deoxyadenosine	133

<i>K. Kiyosawa, T. Sodeyama, Y. Nakano, H. Yoda, E. Tanaka, T. Hayata, K. Tsuchiya, M. Yousuf and S. Furuta (Japan)</i>	
Treatment of chronic non-A non B hepatitis with human interferon B: a preliminary study	151
Announcement	163
No. 4	
<i>H.J. Field and G.A. Brown (U.K.)</i>	
Animal models for antiviral therapy (Mini-Review)	165
<i>M.J.C. Aquino-de Jesus and B.P. Griffith (U.S.A.)</i>	
Cytomegalovirus infection in immunocompromised guinea pigs: a model for testing antiviral agents in vivo	181
<i>L. Borecký, P. Kontsek, M. Novák and V. Lackovič (Czechoslovakia)</i>	
Human acid- and thermolabile α -interferon-like substance: selective reactivity with a monoclonal antibody	195
<i>V.R. Freitas, E.B. Fraser-Smith and T.R. Matthews (U.S.A.)</i>	
Increased efficacy of ganciclovir in combination with foscarnet against cytomegalovirus and herpes simplex virus type 2 in vitro and in vivo	205
<i>S.-S. Choi, R. Rasshofer and M. Roggendorf (F.R.G.)</i>	
Inhibition of hepatitis delta virus RNA replication in primary woodchuck hepatocytes (Short Communication)	213
No. 5, 6	
<i>R.O. Spertzel (U.S.A.)</i>	
Animal models of human immunodeficiency virus infection (Mini-Review)	223
<i>S.J. Sperber and F.G. Hayden (U.S.A.)</i>	
Protective effect of rhinovirus receptor blocking antibody in human fibroblast cells	231
<i>G.D. Hsiung and V.F. Chan (U.S.A.)</i>	
Evaluation of new antiviral agents: II. The use of animal models	239
<i>L.B. Allen, A.G. Teepe, M.J. Kehoe, C.S. Holland, D.J. McNamara and P.D. Cook (U.S.A.)</i>	
Antiviral and cytotoxicity evaluation of 3-nitro-3-deazauridine	259
<i>P.-Z. Tao, N.G. Johansson, G. Stening, B. Öberg and F. Datema (P.R. China, Sweden)</i>	
Inhibition of HIV-1 reverse transcriptase by 5'-triphosphates of 5-substituted uridine analogs	269
<i>H.L. Lucia, D.H. Coppenhaver and S. Baron (U.S.A.)</i>	
Arenavirus infection in the guinea pig model: antiviral therapy with recombinant interferon- α , the immunomodulator CL246, 738 and ribavirin	279

	323
<i>D.I. Bernstein, M.A. Kacica, M.M. McNeal, G.M. Shiff and R.L. Ward (U.S.A.)</i>	
Local and systemic antibody response to rotavirus WC3 vaccine in adult volunteers	293
<i>B. Löfgren, E. Nordenfelt and B. Öberg (Sweden)</i>	
Inhibition of RNA- and DNA-dependent duck hepatitis B virus DNA polymerase activity by nucleoside and pyrophosphate analogs	301
<i>K. Shiraki, T. Okuno, K. Yamanishi and M. Takahashi (Japan)</i>	
Phosphonoacetic acid inhibits replication of human herpesvirus-6 (Short Communication)	311
Announcement	319
Contents of Volume 12	321
Author Index	325
Subject Index	327
